

iConnectivity® Releases iConnectAUDIO2+™ *Ultra-versatile 2-in 6-out Audio & MIDI Interface for musicians and DJs*

January 20, 2016, The NAMM Show Booth #6806— iConnectivity, developer of innovative interfaces for musicians and DJs, announces immediate availability of the iConnectAUDIO2+, the latest in their series of next-generation audio and MIDI interface for Mac, PC, and iOS.

iConnectAUDIO2+ puts flexible audio and MIDI connectivity for the stage, studio, and club into a portable, bus-powered package. Its versatile features and configuration make it ideal for musicians, DJs, and producers.

“Our team has totally nailed the universal interface that grows with you,” says Al Joelson, VP of Sales and Marketing. “It’s built to professional sound and durability standards. It’s a versatile problem-solver, and it’s affordable for everyone.”

iConnectAUDIO2+ accommodates mics, synths, MIDI, instruments, speakers, headphones, and up to two computer devices simultaneously (Mac/PC/iOS). It features two premium combo inputs and six outputs, including an independent headphone mix and assignable direct monitoring. iConnectivity’s unique Audio and MIDI passThru™ technologies allows flexible routing between everything connected.

The interface’s most-used functions can be controlled from its touch panel, and iConnectivity’s iConfig software for iOS, MAC, and PC is included for setting up flexible audio and MIDI routing. Snapshots are then stored in flash memory on the device.

Top Features:

- 2 XLR ¼” TRS combo analog inputs, each with individual +48V phantom power toggle and impedance switching
- 4 ¼” TRS balanced analog outputs
- ¼” Headphone output with independent mix

- Multi-host Device ports – use with up to two computer devices (Mac/PC/iOS) at the same time
- Audio passThru™ routes audio digitally between computer devices
- 1 X 1 MIDI DIN in/out
- iConfig software (Mac/PC/iOS) makes it simple to set up of filtering/routing/mixing/merging scenes – which are also stored in flash memory on the device
- High-resolution audio - up to 24-bit/96kHz AD/DA conversion
- USB Audio 2.0 and USB MIDI 1.0 Class-Compliant
- Capacitive touch display and control surface
- USB Bus powered
- Charges an iOS device when used with optional power supply (not included)

iConnectAUDIO2+ will be on display at Booth #6806, Hall A at the 2016 NAMM Show in Anaheim, CA, from January 21-24, 2016. iConnectAUDIO2+ will be available for purchase Q1 of 2016 with an estimated street price of \$199.99/USD at iConnectivity resellers worldwide.
